The design, permitting, construction, inspection, testing and approval of fire services shall be the responsibility of the certified fire protection engineer engaged by the property owner or designated contractor. The property owner or designated contractor shall be responsible for obtaining approval from all agencies having jurisdiction over the work, including the Town of Princess Anne, Fire Marshal's Office, and Somerset County Department of Technical & Community Services, as required by law.

The applicable fee shall be paid in full and a copy of the approval for the Fire Service shall be attached before application for service can be approved.

Requests for Commercial Fire Service, 3 inches or greater, shall include plans, details, and material specifications for all proposed work including required service size and location, and all proper approvals from governing authorities. . Where required, all designs shall incorporate proper potable water service materials, isolation valves, and backflow prevention devices, subject to the approval of the Sanitary District. Submittals shall be made with Fire Service and Connection Applications. Commercial Fire Services requiring new connections or modifications to Sanitary District mains or infrastructure require that the Sanitary District shall be notified a minimum of 30 days in advance of the start of work. Refer to the Somerset County Sanitary District Design and Construction Standards for additional information. In the event that it becomes necessary for Sanitary District to enforce any of its rights arising hereunder, Sanitary District shall be entitled to its costs, including an award of reasonable attorney's fees and court costs.

I have reviewed the Somerset County Sanitary District Inc. Water, Sewer and/or Fire Service Connection Policy as well as this Application. I understand I am responsible for following the instructions contained in such documents and agree to comply with my obligations as set forth herein.
