

# Mosquito Control – General Policies

Please read these policies before you sign up for service

- 1.) Spray Season: 3<sup>rd</sup> week of May to Mid-October; Monday – Friday 3:00 am - 8:00 am.
- 2.) The spray schedule is to cycle through our list from beginning to end and repeat all season long. Expect service any day Monday – Friday.
- 3.) We do not guarantee weekly service although we will always strive for that goal.
- 4.) We spray for mosquitoes only. Spray drifts with the wind 300 feet and will kill the actively flying insects at that time.
- 5.) Signing up early gets your name on the list early. During the season allow 2-3 weeks before you receive service.
- 6.) In the event of heavy rainfall, we will spray from driveways for 48 hours. Thereafter, it is at the technician's discretion when to drive around houses.
- 7.) If you want us to drive around your house, you must have a yard large enough to warrant this option. You must provide a clear path, mowed lawn, and clearly mark all underground systems.
- 8.) If you live on waterfront property, we will often change the method of how we spray to prevent spray drift over the water.
- 9.) We do not have anyone available in the office to answer incoming phone calls but do listen to voicemails as often as possible and return calls as soon as possible. Turnaround may be delayed during our busiest times.

## Seen this mosquito?

The Asian Tiger Mosquito, will only breed in man-made containers around the house. If you have this mosquito, you have a man-made container holding water nearby. Dump the water to kill the larvae.
